

## Fall/winter preamble for the ITS net

This is (your call sign). Welcome to the Monday night Island Trunk Net. I am (your name). This net is held every Monday at 8 pm.

As most of this system is on solar and battery, the net will be only 30 minutes. Please be brief where possible.

Is there any priority traffic?

At 8:30 the net will move to 3746 khz if propagation allows. Please join us if you can.

Are there any announcements?

Amateur stations from anywhere are invited to check in. Please use your call sign at the start and end of your check in.

### **(Feel free to change up the alphabetic order of check ins from time to time)**

- If you cannot stay for the entire net, check in now.
- Mobiles may check in now.
- After regular check ins we will announce our topic:
  - Call signs starting with Alpha through Gulf;
  - Call signs starting with Hotel through Pappa;
  - Call signs starting with Quebec through Zulu;
  - This is (your call sign). Are there any late or missed stations?

**(Announce the topic and call checked in stations. Don't forget to repeat your own call sign from time to time to let late arriving stations know who is net control as well as to conform to regulations.)**

Are there any late or missed stations?

I will now close the net at (time). Thanks to the (number) stations who checked in.

We will now move to 3746 khz.

73 and good evening. This is (your call sign) going clear.

*(Go to 3746khz for the HF portion of the net.)*
